# WHITEPAPER

INTRODUCTION

Welcome to CYCLOPS97! Here, at the epicenter of the crypto revolution, we draw inspiration from the bold leadership of Cyclops97 and his team from the latest reboot. Prepared to push boundaries and conquer new territories, our community is forged in determination, innovation, and a spirit of adventure.

Just like our mutant heroes, each member of CYCLOPS97 brings with them a unique set of skills and a shared passion for success. From cryptocurrency enthusiasts to seasoned investors, you'll find a haven here for those looking to excel in a world driven by technology and opportunity.

Join us as we ride the waves of the crypto market, overcoming challenges and celebrating victories. Together, we're ready to light the way to a brighter financial future!

WHY CYCLOPS97?

We have drawn inspiration from the recent 97 reboot due to the massive community that passionately follows this saga. With a perfect score on various review platforms, its virality, and the impact it generates on social media, we are confident that more projects will join this trend in the coming months. This will further elevate the status of this community, which is already excited and happy about this revival.

With our coin, we pay tribute to the exemplary team leader, whose new presentation reflects a bold, strategic, and extraordinarily skilled leader. Metaphorically, our coin is represented as a gem with exceptional potential for those who can recognize its value in time.

THE FORMULA FOR SUCCESS

Our goal with the smart contract of CYCLOPS97 (CY97) token is to foster a robust economy that benefits all our holders. We focus on transaction volume as a key metric, as each buy and sell will generate fees that will be distributed for the community's benefit.

*1% of all transactions will be automatically burned, reducing the total supply of tokens in circulation and ultimately increasing its market value. This passive burning will directly impact the market cap and token price, benefiting holders in the long term.

*Additionally, 2% of each transaction will be redistributed among all holders who own at least 10,000 CY97 in their wallets. These redistributions will be automatically made in stable currency (USDT), ensuring a steady flow of income for those holding a significant amount of tokens. As the passive burning reduces the number of available tokens, it's likely that the number of holders meeting this requirement will decrease over time, further increasing the benefit for those who achieve it.
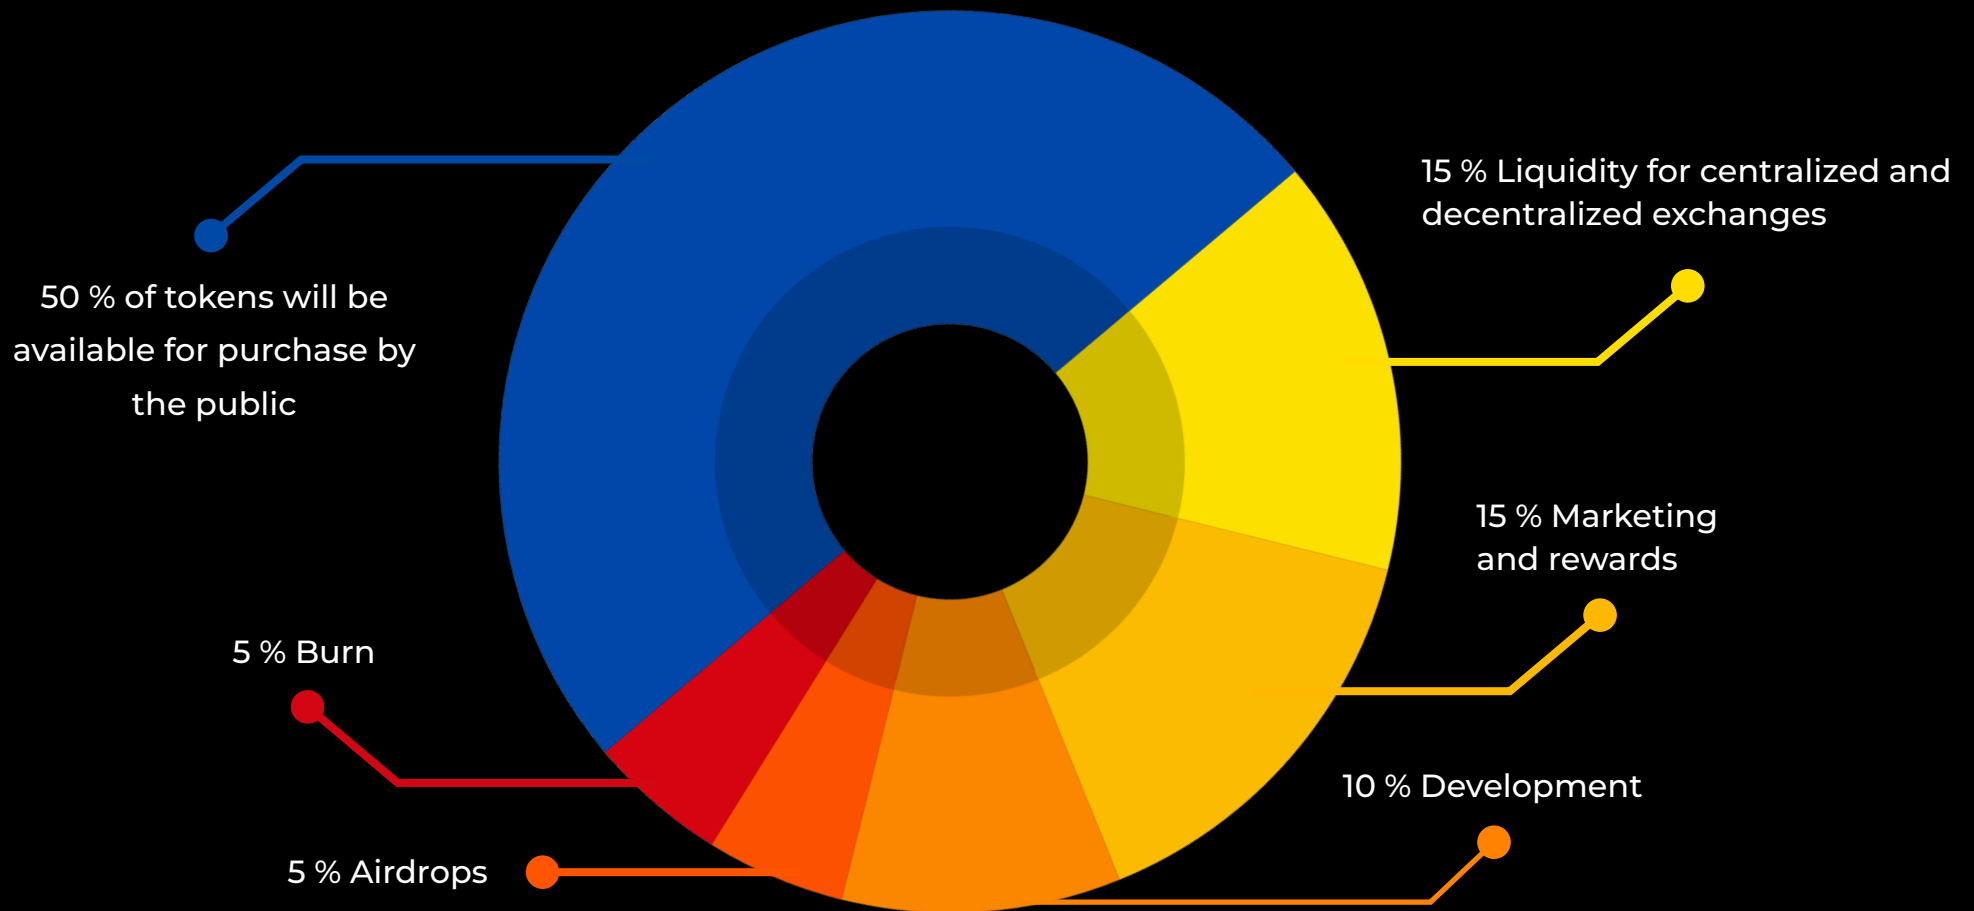

DAILY VALUE

Volume	TAX	Holders with 10 000 CY97	USDT per holder
100k	2%	10 000	0.2
200k	2%	8 000	0.5
500k	2%	5 000	2
1M	2%	2 000	10

In CYCLOPS97, our focus is on creating a "win-win" environment for all involved. If transaction volume increases, so will the rewards. Similarly, if the number of holders meeting the conditions decreases, the rewards will increase as well. Therefore, if you have managed to acquire 10,000 CY97, we recommend that you hold onto them firmly.

*Liquidity is a fundamental metric for any project. Without proper balance, no matter how much the price or market cap increases, investors could have difficulty withdrawing their investment due to liquidity shortages. This is something that many projects ignore or underestimate. For this reason, in CYCLOPS97, 1% of purchases and 2% of sales will be injected directly into the liquidity pool. This will ensure the investment security for all those who trust in our project

TOKENOMICS

50 % of tokens will be available for purchase by the public

15 % Liquidity for centralized and decentralized exchanges

15 % Marketing and rewards

5 % Burn

10 % Development

5 % Airdrops

ROAD MAP

Q1
- Development of a Secure and Smart Contract
- Execution of Initial Marketing Campaigns
- Launching Comprehensive Brand Initiatives

Q2
- CY97 begins with fairness through a fair presale. The team will allocate a portion of the funds raised to an aggressive marketing strategy.
- Official Token Launch
- Listing on DEX and CEX Exchanges
- Locking Liquidity
- Burning 5% of the total supply
- Renouncing ownership of the contract
- Launch of a Major Marketing Campaign
- Involvement of Influential Individuals in Promotion
- Initiation of Sentinel Project Development

Q3
- Achieve a Market Capitalization of $100 Million
- Regular Hosting of Virtual Events and Q&A Sessions
- Strengthening Collaborations with Industry Leaders

Q4
- Launch of Sentinel Project's Web Testnet
- Collaboration with Cross-Promotion Projects
- Release of Sentinel Project's Testnet for Android and iOS

CREATING THE FUTURE

PROJECT SENTINEL

The CYCLOPS97 team has a vision for the future that goes beyond, where the project's currency will support projects of equal or greater magnitude, generating greater confidence in the community and its investors.

Project Sentinel arises from the need to create a play-to-earn (P2E) style game with a real focus on gameplay and mechanics, truly benefiting bold and dedicated players.

Powered by Artificial Intelligence (AI) technology to create experiences with unique challenges and scenarios, backed by PIXEL art that reflects the retro essence of the project group and evokes nostalgia in many generations.

Additionally, we are aiming for a more immersive experience with our avatars generated by facial recognition in PIXEL art, making this initiative a unique project.

Concerned about every detail, we are working hard to show progress to the community as soon as possible.

So, get ready to be part of this revolution! Get comfortable and join us on this exciting journey into the future.
